**A SIX-FOLD
INCREASE IN
CAPABILITIES
WITH ONE
CONTROL
SYSTEM**

THE SIX CHANNEL PROGRAMMER teamed with a **RADIOMETER** pH meter-controller, provides a **time sharing** system for automatic monitoring and control of up to six simultaneous reactions.

This system establishes one or two directional control of pH, to meet your requirements.

Different control points, over the entire pH range, can be accurately maintained in the separate reaction vessels. Individual electrode calibration controls are provided for each station.

Flexible programming allows selection of appropriate time intervals for each channel. Provision is also made for automatic skipping or holding of particular channels. Individual channel selection is readily accomplished, at any time, with manual over-ride.

THE LONDON COMPANY 807 Sharon Drive
Westlake, Ohio 44091
